## WORK EXPERIENCE

### Software Developer

#### Bosch Global Software Technologies

01/2023 - Present

Bengaluru

##### Achievements/Tasks

- Developed RESTful APIs using Java and Spring Boot for seamless communication between frontend and backend systems .
- Integrated frontend components with backend services to ensure smooth functionality and user experience .
- Utilized Git for version control, following branching and merging workflows for collaborative development .
- Conducted code reviews, provided feedback, and collaborated with team members to maintain code quality and consistency .
- Worked closely with stakeholders to understand project requirements and deliver solutions aligned with business objectives .

### Internship

#### Wipro

03/2022 - 07/2022

##### Achievements/Tasks

- Received mentorship and guidance from experienced developers, enhancing technical skills and knowledge of industry best practices .
- Collaborated with senior developers to design and implement RESTful APIs using Spring Boot, facilitating communication between frontend and backend systems .
- Presented a summary of internship projects and accomplishments to company stakeholders during the internship evaluation process .

## EDUCATION

### B.Tech

#### Kalinga Institute of Industrial Technology

2018 - 2022

Bhubaneswar

### Class 12

#### Foundation School

2017 - 2018

Buxar

## SKILLS

ReactJS

Java

MySQL

HTML

CSS

Javascript

SpringBoot

GIT

REST APIs

## PERSONAL PROJECTS

### Connected Car Management App

- Developed a React-based web application with features like KYC management, device onboarding, user creation, and role management .
- Implemented state management using Redux for seamless data flow and efficient application performance .
- Enabled multilingual support with i18n-react, providing localization in 7 languages to cater to global audiences .
- Designed a secure role-based login system, ensuring granular access control and enhanced security .

### SDV and App Store – E-commerce Project

- Built a React-based e-commerce platform to manage SDV (Software-Defined Vehicles) and app store functionalities efficiently .
- Implemented dynamic filtering and sorting features for apps and services, enhancing user discoverability and experience .
- Utilized Redux for state management, ensuring smooth interactions and data consistency across the platform .
- Designed a responsive and intuitive user interface, optimized for seamless usability on desktop and mobile devices .
