WORK EXPERIENCE

Associate software engineer
Bosch global software

01/2023 - Present   *Banglore*
Achievements/Tasks

- Developed RESTful APIs using Java and Spring Boot for seamless communication between frontend and backend systems.
- Integrated frontend components with backend services to ensure smooth functionality and user experience.
- Utilized Git for version control, following branching and merging workflows for collaborative development.
- Conducted code reviews, provided feedback, and collaborated with team members to maintain code quality and consistency.
- Worked closely with stakeholders to understand project requirements and deliver solutions aligned with business objectives.

Intern
Wipro

04/2022 - 12/2022   *Remote*
Achievements/Tasks

- Received mentorship and guidance from experienced developers, enhancing technical skills and knowledge of industry best practices.
- Collaborated with senior developers to design and implement RESTful APIs using Spring Boot, facilitating communication between frontend and backend systems.
- Presented a summary of internship projects and accomplishments to company stakeholders during the internship evaluation process.

EDUCATION

Graduation
Kalinga institute of industrial technology

07/2018 - 06/2022   *8.45*
Courses

- B.tech. in Information and technology

Intermediate
Foundation school, Buxar

04/2016 - 05/2018   *68.4*

Secondary
DAV public school, Buxar

04/2015 - 05/2016   *95*

SKILLS

JAVA   DBMS   MYSQL   HTML   CSS   Javascript   React js   SpringBoot   Git   Jenkins

PERSONAL PROJECTS

E-commerce Website

- Developed a full-fledged e-commerce website using React.js for the frontend and Spring Boot for the backend. Implemented user authentication, product catalog, shopping cart functionality, and checkout process. Technologies used: React.js, Spring Boot, MySQL, HTML, CSS, JavaScript.

Task Management System

- Develop a task management system where users can create, assign, and track tasks. Use React.js for the frontend to create an interactive user interface, and Spring Boot for the backend to handle task CRUD operations and user authentication. Implement features such as task deadlines, priority levels, and task assignment to users.
